Summary

Experienced Software Engineer adept in offering cutting edge engineering solutions. Bringing forth expertise in managing all aspects of the software development life cycle. Skilled in problem-solving and executing software tasks from start to finish.

Areas of Expertise

- Clean coding
- SOLID principles
- Design patterns
- Test driven development
- Progressive Web App
- Trusted Web Activity
- Agile methodologies
- On-site SEO
- Performance Optimisation
- Database design, ORM

Technical Proficiencies

Front-end: **TypeScript**, **JavaScript**, **React**, **Redux**, **Vue.js**, **Angular**, **NgRx**, **RxJS**, **JQuery**, **Sass**
Front-end testing: **Jest**, **Vitest**, **Cypress**, **Selenium**
Back-end: **Node.js**, **Express**, **Prisma ORM**
Tools: **Jira**, **Git**, **GitHub**, **Jenkins**, **CodePipeline**, **Grafana**

Work Experience

Software Engineer @ BBC – London, UK **Feb, 2022 –**

BBC iPlayer

- Contributed to the ongoing evolution of BBC iPlayer's web platform, integrating modern approaches and delivering features that enhance user experience in a highly competitive streaming market.
- **Led epics** by breaking down complex initiatives into well-defined tickets: collaborated with product managers and other teams to clarify high-level requirements, and defined the low-level technical details to ensure successful delivery.
- Delivered features in a **micro frontends** setup — independent, independently deployable apps sharing common libraries, orchestrated and served via Nginx.
- **End-to-end feature delivery**: developed, tested, and deployed safely to production
- **Continuous delivery** - every feature or bugfix deployed to production as soon as completed
- Technologies: **TypeScript**, **Node.js**, **React**, **Micro Frontends**, **Jest**, **AWS**, **Lambdas, A/B Testing**
- Tools: **Git**, **Github**, **Jenkins**, **CodePipeline**, **Grafana**

Software Engineer @ EZ-FRAZiE (personal project) **Sep, 2022 - Apr, 2025**

English learning flashcard app (available on the Play Store)

Designed and developed the application end-to-end: established architecture, implemented frontend and backend, and ensured scalable, maintainable performance.

- Defined the product vision and UX flows to balance user needs with technical feasibility.
- Selected the full tech stack and designed a modular architecture with clean separation of concerns.
- Optimized database design for both transactional efficiency and analytical queries, including event-driven updates for user-facing statistics.
- Developed a cost-efficient data retention strategy to handle inactive and trial users without compromising performance.
- Built a custom database seeding solution to enable robust E2E testing in a data-dependent application.
- Technologies: **TypeScript**, **Vue.js**, **Jest**, **Cypress**, **Node.js**, **Express**, **Prisma ORM**, **PostgreSQL**, **GCP**

Front-end developer @ Betsson Group – Budapest, HU **Jan, 2019 – Feb, 2022**

Online betting sites

- Participated in a greenfield project
- Technologies: **Angular 10**, **NgRx**, **RxJS**, **Karma**, **Jest**
- Tools: **Git**, **Github**, **Bitbucket**, **TeamCity**

Front-end developer @ Accedo.tv – Budapest, HU **July, 2018 – Nov, 2018**

White label web video site

- Developed new features in an existing code base
- Technologies: **React**, **Redux**, **REST**
- Tools: **Git**, **GitHub**, **Webpack**

Front-end developer @ Brand View – Reading, UK **July, 2017 – July, 2018**

Price, Promotion, Product Content and Online Product Positioning Analytics Tool

- Developed new features in an existing code base
- Technologies: **AngularJS**, **Angular**, **REST**, **JavaScript**, **AJAX**, **Design patterns**, **Lodash**, **HighCharts**
- Tools: **Git**, **GitLab**, **GitHub**, **Gulp**

Full-stack developer @ EPAM Systems – Budapest, Hungary **Apr, 2015 – Apr, 2017**

Burberry webshop – mobile version, EPAM Internal Feedback Tool

- Developed new features in an existing codebase
- Developed REST endpoints
- Developed UI
- Created unit tests (JavaScript, Java)
- Created integration tests

- Created Selenium tests
- Code reviews
- Cooperated with other teams in different countries
- Front-end technologies: **JavaScript**, **AngularJS**, **Backbone**, **Underscore**, **JEST**, **Selenium**, **AJAX**, **Webpack**, **Grunt**
- Back-end technologies: **Java**, **Spring Framework**, **Spring MVC**, **Spring Data**, **JPA**, **Hibernate**, **ORM**, **JUnit**, **Mockito**, **AspectJ**, **REST**, **Design patterns**, **Dependency injection**, **Xpath**
- Tools: **Git**, **GitLab**, **Eclipse**, **WebStorm**, **Maven**, **Jenkins**, **Ansible**, **JIRA**, **Crucible**

Full-stack developer @ Quaestor – Budapest, Hungary **Sep, 2008 – Mar, 2015**

Webshop projects, Web video sites, Admin interfaces for VoIP services

- Developed API and UI based on the company's PHP MVC framework
- Responsive web design
- Restful JSON web services
- On-site SEO
- Performance optimization
- Integrated 3rd party services: various payment gateways, analytic tools, authentication
- Technologies: Custom PHP MVC framework, Smarty Light, MySQL, HTML5, jQuery, CSS3

Site-builder @ HowdyGroup Ltd – Budapest, Hungary **Sep, 2007 – Aug, 2008**

Social Networking websites for eastern European countries

- Participated in designing a template system for social network websites
- Optimised site for high traffic
- Technologies: XHTML, CSS 2.1, jQuery

Site-builder @ Docler Holding – Budapest, Hungary **Jun, 2006 – Sep, 2007**

Livejasmin.com and its clone sites

- Optimised the site for high traffic load (over 130 million hits a day)
- Participated in designing a PHP based framework for the company's new websites
- Refactored the site's templates to be fast and customisable for multiple sites
- Technologies: XHTML, jQuery

Education

EPAM Academy, Budapest, Hungary (training)

Intensive course, catch up with current technologies. Following topics were covered:

- Introduction to Java SE and OOP
- Object-Oriented Analysis and Design
- Unit Testing, Mocking and Test Driven Development
- Version Control, Continuous Build and Integration

- Clean Code and Pair Programming
- Spring Core, Spring MVC
- Data Access Technologies
- Front End Technologies
- Web Application Development
- Building Web Services

Denes Gabor College, Budapest, Hungary
Bachelor of Science in Computer Engineering
