Skills

- **Programing Languages**: Go (Golang), C# (Basics), SQL (MSSQL/T-SQL, PL/SQL, Postgres)
- **Backend:** ETL & Data Pipelines, Shell Scripting, REST APIs
- **Databases:** Performance Tuning, Query Optimization, Data Modeling, Stored Procedures
- **Infrastructure:** Docker, Kubernetes (Basics), Server Monitoring, System Integrations

- **Language:** English – Professional working proficiency

Experience

Application Developer / Backend Engineer **UBM Trade; Pilisvörösvár; Hybrid; 2023 – Present**

- Go development (microservices, internal tools, integrations)
- Oracle SQL, PL/SQL, T-SQL development
- building ETL processes and backend integrations for ERP system
- developing end-to-end Data pipelines
- developing real-time Oracle – SQL Server repliacation solution
- building internal monitoring and reporting tools
- working with CI/CD workflows, code reviews, deployment processes, and database optimization

Commercial Data Analyst / Data Engineer **METRO Cash&Carry; Budaörs; Hybrid / Remote; 2021 - 2023**

- SQL and Python ETL process development (for commercial and trading data reporting)
- building modular reporting pipelines (and internal automation tools)
- Maintained and optimized enterprise reporting and analytics systems
- backend data processing for commercial reporting
- Cloud infrastructure (AWS, GCP, Azure) migration project team member (using Snowflake)
- Data modeling, database optimization

Data Analyst & Customer Service Coordinator **Haleon (formerly GSK); Budapest; Hybrid; 2020 - 2021**

- Internal ETL and reporting support tool development
- Enterprise reporting and operational data processing workflow support
- Database administration, query optimization, and data modeling support
- Supply chain and logistics reporting support
- Operational workflow coordination and internal stakeholder communication

Process Data Engineer **AGC Glass Europe; Tatabánya; On-site; 2017 – 2020**

- Real-time production monitoring system development
- Manufacturing analytics and reporting workflow automation
- DEV / UAT / PROD deployment process support for enterprise data systems
- Stored procedures, aggregated views, and reporting structure development
- Production cost optimization project participation focused on process efficiency
- Requirement gathering, reporting automation, and production data analysis

Education & Mentorship

Bachelor of Business Administration and Management, Specialization in Data Engineering and Development
EDUTUS College, Tatabánya; 2016 - 2021

- Studied database systems, SQL, data structures, and enterprise data architecture
- Worked on analytics, reporting, and data processing related university projects
- Mentored university students in SQL, data structures, coding basics and interview preparation
- Assisted junior students and fresh starters with onboarding and technical guidance
