Bence Berényi

Senior Software Engineer

Bence is a passionate full-stack developer with 20 years of hands-on experience, from crafting small webshops to architecting large-scale distributed applications. Primarily backend-focused, Bence has deep expertise in Node.js, TypeScript, NestJS, and Express, paired with solid Angular skills on the frontend, and is equally comfortable designing schemas for MongoDB and relational (SQL) databases, configuring Kubernetes clusters, and building robust CI/CD pipelines. Driven by curiosity and a love of craft, Bence actively seeks out challenging projects that demand creative solutions, believing that great software should be elegant, useful, and a pleasure to work on.

Skills

Languages	Hungarian (native), English (upper intermediate)
Programming	JavaScript, TypeScript
Databases	MongoDB, PostgreSQL, Redis
Frameworks	Node.js, NestJS, Express, Angular, RxJS, SCSS
Testing	Automated testing
DevOps / IaC	Git, Docker, Kubernetes, CI/CD, Terraform
AI	AI component integration (text and voice based)
Cloud	AWS
Other	REST API, Cloud-native microservice architecture, Responsive design, eSIM services, Classified ad portals, Large-scale data migration
Soft skills	Team coordination and leadership, Mentoring junior developers, Technical interviewing and hiring, Collaboration with business stakeholders

Work Experience

Senior Node.js Engineer — Everguest (MGMT Group Kft then Vox Civitas Kft) — 12/2022 – 04/2026

Cloud-Native Microservice Platform with AI Integration — Budapest, Hungary

- Designed and built a greenfield cloud-native Node.js microservice architecture deployed on Kubernetes (AWS).
- Integrated text- and voice-based AI components into services.
- Handled system optimisation, reliability improvements, and operational tasks.
- Tech stack: Node.js, Kubernetes, AWS

Tech lead / Senior Node.js Engineer — Magyar Telekom Nyrt — 08/2019 – 12/2022

eSIM Rollout and Sales Backend Services — Budapest, Hungary

- Developed systems supporting the country-wide eSIM rollout for Apple Watch.
- Built and maintained backend services powering sales and customer-facing workflows.
- Introduced an automated testing process and framework, significantly improving code quality and deployment confidence.
- Mentored junior colleagues and participated in the technical interview and hiring process.

Team lead / Senior Software Engineer — Jofogas.hu / Hasznaltauto.hu — 09/2014 – 05/2019

Classified Ad Portals Development — Budapest, Hungary

- Developed and maintained one of Hungary's largest classified ad portals with high traffic demands.
- Managed a large-scale data migration following a company acquisition.
- Led the transition to responsive design across the platform.
- Planned and implemented projects in close collaboration with business stakeholders.
- Coordinated the team, mentored junior developers, and assisted the technical recruitment process.

Education

- **High School Diploma / IT,** Vocational High School / Neumann János SZKI — **2003 – 2007**

Certificates

- **Angular based Frontend development with TypeScript,** Cubix — **2025**

- **Certified Kubernetes Administrator,** Linux Foundation **2021**
- **Node.js Service Developer (JSNSD),** OpenJS **2021**
- **Node.js Application Developer (JSNAD),** OpenJS **2021**
