English	Upper Intermediate

EDUCATION

2003 - 2007
High School Diploma / IT
Vocational High School / Neumann János SZKI

CERTIFICATIONS

Angular based Frontend development with TypeScript
Cubix · 2025

Certified Kubernetes Administratior
CKE by Linux foundation · 2021

Node.js Service Developer
JSNSD by OpenJS · 2021

Node.js Application Developer
JSNAD by OpenJS · 2021

PERSONAL STATEMENT

A passionate full-stack developer with 20 years of hands-on experience - from crafting small webshops to architecting large-scale distributed applications. Primarily backend-focused, with deep expertise in **Node.js, TypeScript, NestJS** and **Express**, paired with solid **Angular** skills on the frontend. Equally at designing schemas for **MongoDB** and relational databases (**SQL**), or configuring **Kubernetes** clusters and building robust **CI/CD** pipelines.

Driven by curiosity and a love of craft, I actively seek out challenging projects that push boundaries and demand creative solutions. I believe great software is more than functional - it should be elegant, useful, and a pleasure to work on. Always open to new ideas, new stacks, and new problems worth solving.

WORK EXPERIENCE (LAST 3)

Senior Node.js Engineer

Dec 2022 – April 2026

Everguest (MGMT Group Kft then Vox Civitas Kft) · Budapest, Hungary

- Designed and built a greenfield cloud-native Node.js microservice architecture deployed on Kubernetes (AWS).
- Integrated AI components (text and voice based) into services.
- Handled system optimisation, reliability improvements, and operational tasks.

Tech lead / Senior Node.js Engineer

Aug 2019 – Dec 2022

Magyar Telekom Nyrt · Budapest, Hungary

- Developed systems supporting the country-wide eSIM rollout for Apple Watch.
- Built and maintained backend services powering sales and customer-facing workflows.
- Introduced an automated testing process and framework, significantly improving code quality and deployment confidence.
- Mentored junior colleagues and participated in the technical interview and hiring process.

Team lead / Senior Software Engineer

Sept 2014 – May 2019

Jofogas.hu / Hasznaltauto.hu (Schibsted CMH Kft then Adevinta CMH Kft) · Budapest, Hungary

- Developed and maintained one of Hungary's largest classified ad portals with high traffic demands.
- Managed a large-scale data migration following a company acquisition.
- Led the transition to responsive design across the platform.
- Planned and implemented projects in close collaboration with business stakeholders.
- Coordinated the team, mentored junior developers, and assisted the technical recruitment process.

I consent to the processing of my personal data included in this CV for recruitment purposes, in accordance with Regulation (EU GDPR).
