NodeJS · Laravel · TypeScript · APIs · Leadership

PROFILE

Lead Backend Engineer with 10+ years of experience building and modernizing production applications, with hands-on experience in Node.js, TypeScript, and Laravel/PHP.
My work includes distributed services, real-time communication, API integrations, and asynchronous processing across logistics, trading, and business applications.
I lead a team of 10+ developers while remaining directly involved in architecture and implementation.
My responsibilities include technical planning, interviews, code reviews, mentoring, and legacy system migrations.
I take features from business requirements through technical design, development, deployment and production support.
I use AI-assisted development tools such as Codex and Claude fo improve code quality.

EDUCATION

Dennis Gabor University | Gábor Dénes Egyetem
BSc in Computer Science Engineering - In progress
2026 - Present

University of Bedfordshire
International Course
2010 - 2011

Technical School for Energetics
Secondary Education - Mechanical Engineering
2005 - 2009

EXPERIENCE

Hungarian Post - Magyar Posta | 2023 - 2026
Lead Software Engineer - Budapest, Hungary · Remote

- Lead a team of 10+ developers, coordinate development work and guide architectural decisions while remaining hands-on with implementation
- Conduct technical interviews, review code and mentor developers
- Plan and deliver legacy system migrations and incremental modernization
- Led end-to-end development of the Smart by MPL fulfillment platform, covering the front office, back office and warehouse PDA application
- Built integrations connecting order processing, inventory management, warehouse operations and external logistics services
- Designed and developed an AI-based route optimization tool for parcel delivery

Inline Studio | Jan 2021 – Jun 2026

Owner & Lead Software Engineer · Budapest, Hungary · Remote

- Ran my own software development business alongside full-time employment, translating client requirements into working applications
- Developed backend services using Node.js, TypeScript and Laravel, including APIs, integrations and asynchronous workflows
- Designed database schemas and data synchronization between business systems
- Developed a production weighing application for Coca-Cola to measure material quantities used in manufacturing
- Delivered React and Vue.js interfaces where projects required full-stack development
- Managed technical delivery from planning through deployment and production support using Docker, AWS and CI/CD pipelines

DPD Hungary Kft. | Oct 2018 – Sep 2020

Senior Developer · Budapest, Hungary · Full-time · Hybrid

- Developed a Duties & Taxes module using Laravel and Vue.js
- Refactored international customs systems and maintained integrations with external services
- Maintained and extended production logistics applications supporting daily operations

Voodoo Park Ltd. | Aug 2017 – Oct 2018

Senior Developer · London, United Kingdom · Remote

- Developed Node.js applications and worked with AWS-based systems
- Delivered backend and frontend functionality and integrations between applications

Telenor Hungary | Feb 2015 – Feb 2017

Software Developer · Törökbálint, Hungary · Full-time · On-site

- Developed internal tools and chatbot applications using Node.js and AWS
- Integrated internal systems and services to support business workflows
- Contributed to a Salesforce-based customer service platform

Purple 24 Ltd. | Apr 2013 – Jan 2015

Web Developer · London, United Kingdom

- Developed an online trading platform with backend services, frontend interfaces, MetaTrader integration, and live price feeds
- Built Node.js and WebSocket functionality for real-time data delivery across white-label platform instances
- Worked with MySQL, Nginx, and AWS across a distributed architecture
- Developed CRM, CMS, and reporting tools, and configured load balancing, server redundancy and SSL

3TG Brokers | Nov 2011 – Jan 2013

Junior Web Developer · Budapest, Hungary

- Developed frontend interfaces using JavaScript, jQuery and CSS
- Built an internal support ticketing system and integrated MetaTrader with MySQL
- Worked with load balancing and SSL configuration

CORE STRENGTHS

- **Backend**: Node.js · TypeScript · Javascript · Laravel · PHP · REST APIs · Queues · API Integrations · WebSockets · Background Processing
- **Frontend**: React · Vue.js · JavaScript · TypeScript
- **Data**: PostgreSQL · MySQL · Redis · Data Migrations · Data Optimization
- **Cloud & Delivery**: AWS · Docker · Kubernetes · CI/CD · Linux
- **Leadership**: Technical Planning · Software Architecture · Code Reviews · Mentoring · Team Coordination · Technical Interviews
- **AI-Assisted Development**: Codex · Claude

SELECTED PROJECTS

Hungarian Post — Fulfillment Platform
Oct 2023 – Dec 2025

- Developed core Laravel backend services for order intake, inventory handling, warehouse processing, and shipment management.
- Integrated external transport management systems and partner APIs, using queues and database optimizations to support reliable data synchronization.
- Built internal administration tools and an Android PDA application for warehouse scanning and item management.

Hungarian Post — Vehicle Routing System
Jan 2025 – Feb 2026

- Designed and implemented a vehicle routing system for delivery planning and estimated delivery times.
- Applied routing algorithms and predictive models to support route optimization and delivery-window planning.

Public Broker Company - Trading Automation Platform
Sep 2025 – Apr 2026

- Designed and developed a distributed platform using Laravel and Node.js, integrating multiple Dockerized MetaTrader 5 instances.
- Implemented a central control service and worker nodes for trade execution, copy trading, and account synchronization.
- Built workspace-based account management and a separate AI analysis layer that aggregated signals from five strategies into a dashboard.

Polyax - MRP System
May 2024 – Jan 2025

- Developed a Laravel and TypeScript integration platform connecting ERP, warehouse, and billing systems.
- Automated data synchronization and standardized data formats across external systems, replacing manual data transfers.

CERTIFICATIONS

- **Salesforce Certified Platform Developer** - Issued September 2015
- **Salesforce Certified Administrator** - Issued April 2015
