SUMMARY

Software Engineering Professional with expertise in designing, developing, testing, deploying, and maintaining scalable software systems and data-driven solutions. Experienced in software architecture, backend development, database design, cloud deployment, test automation, and AI/ML integration across the software development lifecycle. Proficient in multiple programming languages, modern development frameworks, and cloud technologies, with a strong focus on system performance, code quality, and automation. Recognized for analytical problem-solving, cross-functional collaboration, and delivering robust, high-impact software solutions.

WORK EXPERIENCE

Freelance Software Consultant

Oct 2025 - June 2026

- Gathered requirements and designed the architecture for a POS data analytics pilot project, aligning the solution with business reporting and forecasting requirements.
- Designed and implemented an ETL pipeline to consolidate over 50 GB of fragmented sales data into a custom PostgreSQL reporting database, reducing query latency by 40%.
- Built a custom executive dashboard to provide stakeholders with real-time visibility into restaurant sales performance and key business metrics.
- Integrated Scikit-learn predictive models and AI-generated insights to automate trend forecasting and support data-driven business decisions.
- Deployed the reporting database, ETL services, and analytics dashboard on AWS, enabling secure, scalable, and reliable access for stakeholders.
- Designed comprehensive test scenarios and test cases covering ETL workflows, data integrity, dashboard functionality, reporting accuracy, and predictive model validation.
- Designed and Implemented automated ETL and data validation tests using pytest, reducing manual verification effort and improving release confidence.
- Executed functional, integration, regression, and performance testing to ensure data accuracy, system reliability, and production readiness.
- Incorporated stakeholder feedback throughout the pilot, refining dashboard features, analytics, and reporting capabilities to improve usability and align with evolving business requirements.
- Collaborated with stakeholders of a tech company and using received input and additional research drafted technical job descriptions for Engineering roles and led the hiring initiative.

Lead - Troia Corporation, Remote

Aug 2025 - Sept 2025

- Own and lead QA planning, execution, and reporting.
- Design and implement comprehensive test plans covering manual and automated scenarios.
- Perform hands-on testing (manual and automated) for web, mobile, and backend systems.
- Build, maintain, and scale automation frameworks using tools.
- Define and enforce engineering best practices, ensuring consistency and quality across releases.

Software Engineering Professional

✉ umr.firdausi@gmail.com | ☎ +94 777 786 008 | 📍 Colombo, Sri Lanka
in <https://www.linkedin.com/in/umar-firdausi-12678484/>

WORK EXPERIENCE

Lead - Troia Corporation (Continued)

- Mentor and support engineering team members.
- Work with development teams to integrate testing into CI/CD pipelines.
- Manage defect tracking and resolution using tools.
- Continuously assess and improve test coverage, performance, and reliability.
- Ensure release readiness by validating test results and coordinating with stakeholders.

Associate Manager - Syscolabs (Pvt) Ltd, Colombo.

Dec 2022 - May 2025

- Collaborated effectively with all stakeholders of given projects and thereby dropped any delays and potential impacts to releases by 90%.
- Worked closely with the team and regularly reviewed artifacts, deliverables, and timelines that ensured and increased timely delivery by 60% while maintaining quality standards at 100%.
- Initiated thorough reviews across the test plans and test cases and tracked the test execution effectively, which resulted in a 0% defect leakage.
- Led and mentored team members with tailored approaches, resulting in a significant increase in overall team efficiency.
- Prepared estimations by reviewing test requirements in detail and provided close to accurate estimations that were able to make it by the agreed timeline at least 80% of the time.
- Initiated defect triages and conducted them interactively, which reduced the overall delay for resolutions by at least 70%.
- Led the initiative for rebranding the project's awareness and scope and designed the wireframes for the home page and following pages for the new site, which is set to increase traction towards the project by at least 40%.
- Collaborated with peer managers and brainstormed ideas that helped solve critical issues in the quality engineering practice.
- Resolved conflicts between team members diplomatically and objectively and managed to maintain an employee retention level of 100%.

Lead - ConceptVines LLC (now Verdentra), Colombo.

Dec 2021 - Dec 2022

- Established quality engineering practices across all projects by interactively engaging all QE team members and thereby securing a coverage of 80%.
- Designed and implemented an effective and simple test automation framework able to automate API testing 100%.
- Owned and executed individual projects successfully from design to implementation
- Expedited hiring by working closely with the management and talent acquisition partners and incorporating more effective interview methods.
- Mentored newly hired QE members and subordinates and helped them steer through challenges confidently. Hence, it maintained a 100% retention rate.
- Implemented QE metrics across projects and utilized the outcome to address low-performing areas and managed to bring them over 50%.

WORK EXPERIENCE

Senior Lead - Pearson Lanka (Pvt) Ltd, Colombo.

Nov 2021 - Dec 2021

- Designed and developed the API automation testing framework using Rest Assured, which was key for maintaining the team efficiency above 80% for each sprint.
- Integrated the automation framework with log4j and Allure for graphical reports, and thereby increased the collaboration with all technical and non-technical stakeholders by 80%.
- Integrated the API automation suite with Jenkins to enable CI/CD execution
- As DevOps Champion, I reviewed progress and continuously engaged the team to reach a goal of being at least a 70% successful DevOps team.
- Engaged interactively in architecture and other solution design discussions that helped identify and reduce any chance of potential bugs by at least 30%.

Lead - Pearson Lanka (Pvt) Ltd, Colombo.

Apr 2018 - Oct 2021

- Owned onboarding testing a new business model known as 'Inclusive Access' by Pearson
- Joined as QE Lead by a special request made by the product owner, given my great communication skills and reputation for high quality and standards.
- Leveraged my ability to collaborate effectively with integration teams and thereby owned 100% of driving the end-to-end test effort for Pearson's Next Generation product line.
- Initiated CI/CD integration by building a Jenkins pipeline with jobs configured with the SCM and triggering builds upon commits. Further enhancements enabled test execution against any application environment. Also included is the Allure reports integration, which produced more structured reports. The overall effort brought about an 80% increase in automated test execution efficiency.
- Designed a new strategy for performance testing microservices, which saved time and effort by at least 30% compared to the conventional methods.
- Groomed new & existing team members to get on board with the automation framework and documented a set of guidelines to be followed.
- Implemented Jacoco code coverage for the test automation code integrated into the Sonar dashboard, which helped reflect the code coverage and improved test automation effectiveness by at least 30%.
- Initiated reviews for QE and Dev source code, repositories, and service logs as proactive measures to determine root causes of issues. This at least decreased the turnaround time for resolving issues by 30%.

Associate Lead - Pearson Lanka (Pvt) Ltd, Colombo.

Apr 2016 - Mar 2018

- Initiated and successfully transitioned 100% of a microservices-based project from the US remotely.
- Introduced and established a robust 100% service level automation suite for a microservice-based application from the beginning, using the Rest Assured framework.

UMAR FIRDAUSI

Software Engineering Professional

in <https://www.linkedin.com/in/umar-firdausi-12678484/>

WORK EXPERIENCE

Associate Lead - Pearson Lanka (Pvt) Ltd, Colombo (Continued)

- Trained and groomed a novice QE team on service-level testing, both manual and automated.
- Designed and maintained automation code repositories in the SVN (Bitbucket), followed by an effective branching strategy to manage code, which improved overall source code management by at least 60%.
- Improved test execution efficiency by 80% through designing Jenkins jobs and integrating all service-level automation tests with the capability of execution against all test and live environments.
- Engaged proactively in troubleshooting production issues and incidents by looking at server logs and application source code overall, resulting in a 30% decrease in turnaround time.
- Confidently collaborated with global teams, enabling a smooth flow of business operations.

Senior Engineer - Pearson Lanka (Pvt) Ltd, Colombo

Apr 2014 - Mar 2016

- Proactively stepped in as acting lead during the absence of the lead and prepared test plans for a critical change in data centers.
- Transitioned a project 100% while based in Denver, Colorado, USA, and maintained the same rhythm and rapport with the product director while offshore, which enabled smooth continuation of operations.
- Maintained collaboration and communication at levels above 80% with the team in the US and stakeholders based in Sri Lanka.
- Established a 100% fully automated service-level testing framework integrated with a CI/CD server in collaboration with the Dev team.
- Actively engaged in building the CI/CD pipeline for A-B deployments in the AWS environment. Thus, they became equally competent in deploying releases or troubleshooting when a deployment issue occurs, and hence contributed to a 75% increase in QE competency levels.

Engineer - Pearson Lanka (Pvt) Ltd, Colombo.

May 2013 - Mar 2014

- Initiated test planning and execution for a major data center migration release that helped maintain an error rate close to 0%.
- Effectively tracked test execution progress, test execution results, and test artifacts, respectively, in test and defect management tools.

QA Tester - Virtusa Corp (Pvt) Ltd, Colombo

Jan 2011 - May 2013

- Excelled in developing automated test plans/scripts, which accounted for approximately 60% of manual test cases, and rapidly discovered defects at an early stage with a faster pace.
- Contributed 100% to high-reliability technology releases as a result of thorough testing that helped maintain Virtusa's industry-leading sales ranking, market share, and customer satisfaction rating.
- Employed an 80% 'test-to-break' testing initiative and clarified ambiguous requirements to measure and improve the effectiveness of all test plans.

KEY SKILLS

- Requirement Gathering & Analysis
- UI & API Manual and Automated Testing
- Building Test Automation Frameworks
- Solution Design Collaboration & Review
- Functional Test Planning, Strategy & Estimation
- Functional Test Design & Execution
- Performance, Reliability & Non-Functional Test Planning, Strategy & Estimation
- Performance, Reliability & Non-Functional Test Design & Execution
- Resource Planning, Budgeting & Estimation
- System Design, Development & Implementation
- Team Leadership & Coordination
- Clear & Concise Communication
- Active Listening & Engagement
- Creative & Analytical Thinking
- Attention to detail
- Quick Learner
- Cross-functional Collaboration
- Effective Time Management
- Adaptability and Flexibility
- Teamwork and Collaboration
- Employee Coaching, Mentoring & Evaluation
- Hiring & Development

TOOLS & TECHNOLOGY

- Java
- Jasmine
- Python
- Selenium
- Rest Assured
- Git
- Maven
- TestNG
- JUnit
- Pytest
